1. Introduction

1.1 Project Overview

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

1.2 User Story

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application. I want to access and update employer details, distinguish online and offline customer records using record types, automate order quantity and total bill calculations, generate reports and dashboards, and automate birthday email notifications with special offers.

1.3 Purpose

- Streamline customer relationship management
- Automate billing and order calculations
- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

2. Ideation Phase

2.1 Problem Statement

Persona	Goal	Problem / Cause	Impact
Sales Representative	Manage customer orders and billing	Manual calculations cause incorrect order quantities and bills	Stressed and inefficient
Store Manager	Monitor sales and customer records	Reports are delayed/incomplete and data is spread across files	Confused and dissatisfied
Customer	Receive personalized offers and updates	No timely automated communication	Disconnected and undervalued

2.2 Empathy Map Canvas

Aspect	Description
Think & Feel	Need accurate customer data and reports
Hear	Feedback from management
See	Multiple registers and spreadsheets
Say & Do	Enter data manually
Pain	Errors, delays, data loss

Gain	Automation, fast reports
------	--------------------------

2.3 Brainstorming

- Manual CRM system
- Excel-based management
- Web-based CRM
- Salesforce-based CRM
- Automated email system

Selected Idea: Salesforce-based CRM Application for TheChaiShop&Co.

3. Requirement Analysis Phase

3.1 Customer Journey Map

Login → Access CRM Application → Enter Customer Data → Generate Orders → Calculate Bills → View Reports → Decision Making

3.2 Functional Requirements

ID	Requirement
FR-1	User Login
FR-2	Object Creation
FR-3	Data Entry
FR-4	Billing Automation
FR-5	Report Generation
FR-6	Email Automation

3.3 Non-Functional Requirements

ID	Attribute	Requirements
NFR-1	Usability	Simple UI, clear navigation, easy forms, user-friendly dashboards.
NFR-2	Security	Role-based access, secure authentication, encrypted storage, backup/recovery.
NFR-3	Reliability	Automatic saving, regular backups, error handling, stable cloud environment.
NFR-4	Performance	Fast page loading, quick reports, smooth dashboards, minimal delay.
NFR-5	Availability	24/7 access, minimal downtime, cloud hosting, disaster recovery.
NFR-6	Scalability	Support more users/data, expandable storage,

		maintained speed.
--	--	-------------------

3.4 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards.

3.5 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards

4. Project Design Phase

4.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports reduce delays, supporting accurate and timely business insights.

4.2 Proposed Solution

Capability	Description
User Login & Authentication	Secure access using valid credentials.
Customer Record Management	Create, view, update and delete customer details.
Employer & Enterprise Management	Manage employer and enterprise account information.
Order Management	Create and track customer orders, quantities and product details.
Automated Billing	Formula fields calculate order quantity and total bill.
Validation Rules	Validate phone, PAN and Aadhaar-related data.
Record Types & Page Layouts	Separate layouts for online and walk-in customers.
Global Picklists	Standardize gender, items, payment mode and item types.
Email Notification System	Birthday, offer and order-related notifications.
Workflow & Flow Automation	Trigger updates and alerts using Salesforce Flows.
Report Generation	Sales, customer and enterprise performance reports.
Dashboard Visualization	Interactive analytics for management.
Data Backup & Recovery	Secure cloud storage and recovery.
User Role Management	Profiles and permission sets control access.

4.3 Solution Architecture

1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

5. Project Planning & Scheduling

5.1 Project Planning

- Salesforce Developer account created.
- Custom objects designed for customer, employer and enterprise data.
- Custom tabs and Lightning Application developed.
- Fields, relationships and global picklists configured.
- Page layouts and record types created.
- Validation rules implemented.
- Email templates and automated flows developed.
- Reports and dashboards created.
- Regular sprint reviews and testing conducted.

5.2 Product Backlog

Story	Task	Points	Priority	Sprint
USN-1	Create Salesforce developer account	1	High	Sprint-1
USN-2	Create Customer, Employer and Enterprise objects	3	High	Sprint-1
USN-3	Create separate tabs	3	High	Sprint-2
USN-4	Create dedicated Lightning App	3	High	Sprint-2
USN-5	Create customer and order fields	5	Medium	Sprint-2
USN-6	Customize page layouts	5	High	Sprint-2
USN-7	Create Online/Walk-In record types	5	Medium	Sprint-2
USN-8	Validate customer and order inputs	3	High	Sprint-3
USN-9	Automate email notifications	5	High	Sprint-3

USN-10	Automate billing calculations	5	High	Sprint-4
USN-11	Create sales/customer reports	4	High	Sprint-5
USN-12	Create visual dashboards	4	Medium	Sprint-6

5.3 Sprint Schedule

Sprint	Points	Duration	Start	End	Release / Completion
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20 / 29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	—
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	—
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	—

6. Project Development & Implementation

6.1 Project Flow / Milestones

Milestone 1: Creation of developer account

Milestone 2: Object creation

Milestone 3: Tabs

Milestone 4: The Lightning App

Milestone 5: Global Picklists

Milestone 6: Fields and Relationships

Milestone 7: Page Layouts

Milestone 8: Record Types

Milestone 9: Validation Rules

Milestone 10: Email Templates

Milestone 11: Flows

Milestone 12: Reports and Dashboards

Milestone 13: Conclusion

6.2 Salesforce Objects

Object	Purpose	Key Data
--------	---------	----------

Employer Account	Employer/staff information	Name, gender, phone, email, DOB, Aadhaar, PAN, designation, salary
Customer Account	Customer and sales information	Name, gender, phone, DOB, email, address, products, chai, payment mode, employer
Enterprise Account	Enterprise sales information	Enterprise name, phone, email, address, products, employer, order quantity, total bill, payment mode

6.3 Custom Tabs & Lightning App

The application is named TheChaiShop&Co and uses standard navigation with Customer Accounts, Employer Accounts, Enterprise Accounts, Reports and Dashboards.

The screenshot shows a mobile application interface for 'TheChaiShop&Co'. A modal form titled 'New Customer Account: Online Order' is displayed. The form has a header with the title and a close button. Below the header, there's a section for 'Payment Mode' with a dropdown menu showing '--None--'. A red asterisk indicates required information. The main section is 'Customer Details', which includes input fields for 'Customer Account Name', 'First Name', 'Last Name', 'Gender' (dropdown), 'Phone Number', and 'Email ID'. The 'Owner' field is pre-filled with 'Arun Kumar'. At the bottom, there are three buttons: 'Cancel', 'Save & New', and 'Save'. The background shows a list of customer accounts with columns for 'Customer Account Name' and 'Maddy'.

Figure 1. Customer Accounts implementation screen.

The screenshot shows the same mobile application interface. A modal form titled 'New Employer Account' is displayed. The form has a header with the title and a close button. Below the header, there's a section for 'Information' with input fields for 'Employer Account Name', 'First Name', 'Last Name', 'Gender' (dropdown), 'Phone Number', and 'Email ID'. The 'Owner' field is pre-filled with 'Arun Kumar'. At the bottom, there are three buttons: 'Cancel', 'Save & New', and 'Save'. The background shows a list of employer accounts with columns for 'Employer Accounts' and 'All'.

Figure 2. Employer Accounts implementation screen.

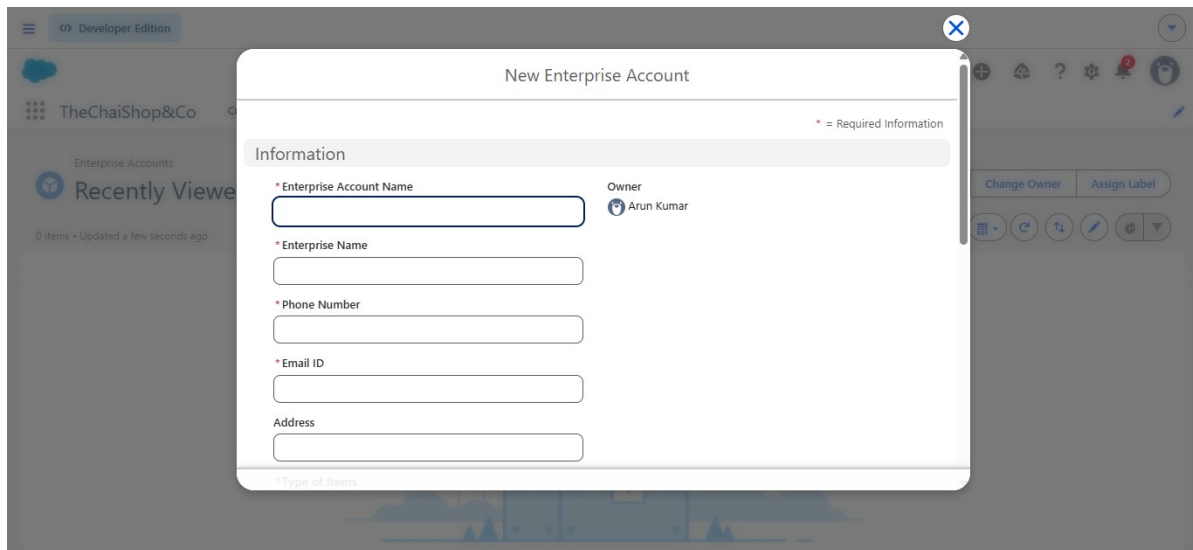

Figure 3. Enterprise Accounts implementation screen.

6.4 Global Picklists

Picklist	Values
Gender	Male; Female; Others
Items	Platinum Tea Powder; Double Delight Tea Powder; Super Dust Tea Powder; Osmania Biscuits (Value Pack); Osmania Biscuits (Premium Pack); Dry Fruit Biscuits; Fruit Biscuits; Salt Biscuits; Multigrain Biscuits; Ragi Biscuits; Double Choco Chip Cookies; Butter Almond Cookies; Melting Moments Cookies; Honey Oats Cookies; Delight Box; Signature Box; Assorted Box
Payment Mode	Gpay; PhonePe; Paytm; Credit or Debit card; Cash
Type of Items	Tea powder; Cookies; Gift Hampers

6.5 Key Customer Fields

Field	Type	Purpose
First Name	Text	Customer first name
Last Name	Text	Customer last name
Gender	Picklist	Standardized value
Phone Number	Phone	Customer contact
Date of Birth	Date	Birthday automation
Date of Birthday is today?	Formula / Checkbox	TRUE when day and month match today
Email ID	Email	Notification recipient
Address	Text	Customer address
Type of Items	Multi-select Picklist	Product category
Products purchased	Multi-select Picklist	Selected products
Chai	Multi-select Picklist	Tea selection

Payment Mode	Picklist	Payment method
Associated Employer	Lookup	Employer relationship
Order Quantity	Formula / Number	Counts selected products/tea items
Total Bill	Formula / Number	Calculates bill from configured prices

The screenshot displays a CRM interface for a 'Customer Account' named 'Maddy'. The left sidebar contains a 'Customer Details' section with the following information:

- Customer Account Name:** Maddy
- First Name:** Maddy
- Last Name:** MAK
- Gender:** Female
- Date of Birth:** 4/2/2004
- Date of Birthday is today?** (checkbox)
- Owner:** Arun Kumar
- Phone Number:** (987) 654-3210
- Email ID:** arunkeerthi1983@gmail.com
- Address:** Tiruvannamalai

The right sidebar shows a list of activities with filters: 'All time', 'All activities', 'All types'. It includes a 'Refresh' button and a 'View All' link. Below the filters, there is a section for 'Upcoming & Overdue' activities, which currently shows 'No activities to show.' and a message: 'Get started by sending an email, scheduling a task, and more.' A 'Show All Activities' button is at the bottom.

Figure 4. Sample Customer Account record.

6.6 Order Quantity Formula

The source implementation counts each selected product/tea item as one unit using INCLUDES() against Products_Purchased__c and Chai__c.

```
IF(INCLUDES(Products_Purchased__c,"Platinum Tea Powder"),1,0) + IF(INCLUDES(Products_Purchased__c,"Double Delight Tea Powder"),1,0)
+ IF(INCLUDES(Products_Purchased__c,"Super Dust Tea Powder"),1,0) + IF(INCLUDES(Products_Purchased__c,"Osmania Biscuits (Value
Pack)"),1,0) + IF(INCLUDES(Products_Purchased__c,"Osmania Biscuits (Premium Pack)"),1,0) + IF(INCLUDES(Products_Purchased__c,"Dry
Fruit Biscuits"),1,0) + IF(INCLUDES(Products_Purchased__c,"Fruit Biscuits"),1,0) + IF(INCLUDES(Products_Purchased__c,"Salt Biscuits"),1,0) +
IF(INCLUDES(Products_Purchased__c,"Multigrain Biscuits"),1,0) + IF(INCLUDES(Products_Purchased__c,"Ragi Biscuits"),1,0) +
IF(INCLUDES(Products_Purchased__c,"Double Choco chip Cookies"),1,0) + IF(INCLUDES(Products_Purchased__c,"Butter Almond Cookies"),1,0)
+ IF(INCLUDES(Products_Purchased__c,"Melting Moments Cookies"),1,0) + IF(INCLUDES(Products_Purchased__c,"Honey Oats Cookies"),1,0) +
IF(INCLUDES(Products_Purchased__c,"Delight Box"),1,0) + IF(INCLUDES(Products_Purchased__c,"Signature Box"),1,0) +
IF(INCLUDES(Products_Purchased__c,"Assorted Pack"),1,0) + IF(INCLUDES(Chai__c,"TheChaiShop&Co Special Tea"),1,0) +
IF(INCLUDES(Chai__c,"Single Tea"),1,0) + IF(INCLUDES(Chai__c,"Masala Tea"),1,0) + IF(INCLUDES(Chai__c,"Lemon Tea"),1,0) +
IF(INCLUDES(Chai__c,"Ginger Tea"),1,0) + IF(INCLUDES(Chai__c,"Green Tea"),1,0) + IF(INCLUDES(Chai__c,"Sugar Free Tea"),1,0)
```

6.7 Total Bill Formula

The configured formula assigns the documented price to each selected item and adds the values.

Documented prices: Platinum Tea Powder 175; Double Delight Tea Powder 150; Super Dust Tea Powder 125; Osmania Biscuits Value Pack 50; Premium Pack 80; Dry Fruit Biscuits 110; Fruit Biscuits 160; Salt Biscuits 110; Multigrain Biscuits 170; Ragi Biscuits 190; Double Choco chip Cookies 200; Butter Almond Cookies 110; Melting Moments Cookies 150; Honey Oats Cookies 160; Delight Box 850; Signature Box 1500; Assorted Pack 600; Special Tea 70; Single Tea 50; Masala Tea 60; Lemon Tea 40; Ginger Tea 55; Green Tea 45; Sugar Free Tea 55.

6.8 Page Layouts & Record Types

Two Customer Account page layouts are used: Online Orders and Walk-In Orders. Two active record types map to these layouts: Online Order and Walk-In Order.

Record Types

2 Items, Sorted by Record Type Label

Quick Find

New

Page Layout Assignment

RECORD TYPE LABEL	DESCRIPTION	ACTIVE	MODIFIED BY
Online Order		✓	Arun Kumar, 9/24/2026, 9:45 AM
Walk-In Order		✓	Arun Kumar, 9/24/2026, 9:46 AM

Figure 5. Customer Account record types.

6.9 Validation Rules

Validation is used to prevent invalid phone/Aadhaar-style numeric input according to the configured rules.

Validation Rules					New
1 Items, Sorted by Rule Name					
RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY	
Phone_Number	Top of Page	The phone number field must not be blank The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)	✓	Arun Kumar, 9/24/2026, 10:17 AM	

Figure 6. Validation Rules configured in Salesforce.

6.10 Birthday Email Template

Template: Birthday Offer Email. Subject: Special Birthday Offer Inside! The template uses the Customer Account First Name merge field and communicates a birthday discount.

Email Template

Send Test and Verify Merge Fields

Subject | Special Birthday Offer Inside!

Plain Text Preview

Dear {!Customer_Account__c.First_Name__c},

Happy Birthday from all of us at TheChaiShop&Co! 🎉🍰 We hope your special day is filled with joy, laughter, and wonderful memories.

To celebrate your birthday, we have a special gift just for you! As a token of our appreciation for your continued support, we're delighted to offer you an exclusive birthday discount.

🎁 **Birthday Offer:** Enjoy a fantastic 50% off on your next purchase as our birthday gift to you!

This offer is our way of saying thank you for being a valued customer. Simply use the code [HBDAY50] at checkout to redeem your birthday treat.

We hope this special offer adds a little extra sparkle to your birthday celebrations!

Once again, happy birthday! Thank you for choosing TheChaiShop&Co! and being part of our community.

Warm regards

TheChaiShop&Co!

Figure 7. Birthday Offer Email template.

6.11 Birthday Email Alert & Scheduled Flow

The Email Alert uses the Birthday Offer Email template and sends to the customer Email ID. A scheduled-triggered Flow runs daily, selects Customer Accounts where the birthday formula is TRUE and an email address exists, and invokes the Happy Birthday email alert.

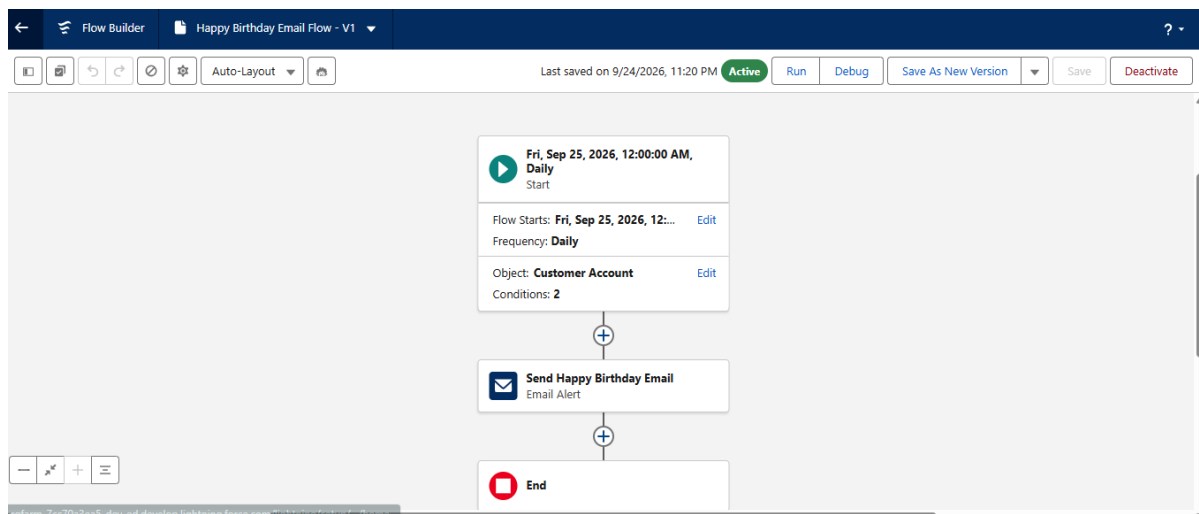

Figure 8. Scheduled Birthday Email Flow.

6.12 Reports

Two reports are configured: Customer Account Sales Report and Enterprise Account Sales Report.

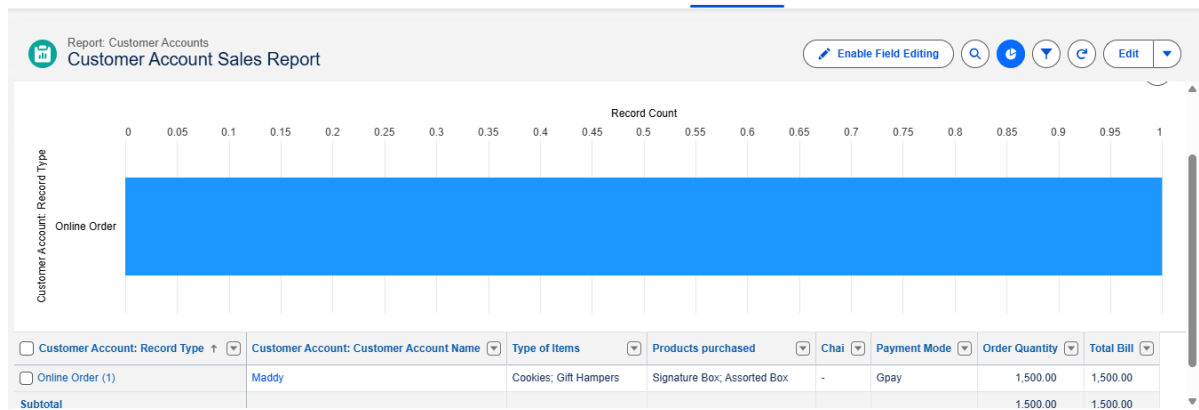

Figure 9. Customer Account Sales Report.

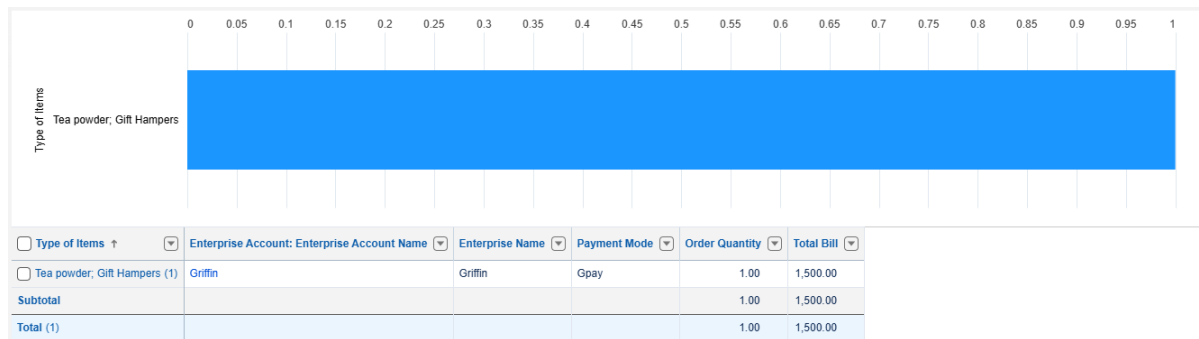

Figure 10. Enterprise Account Sales Report.

6.13 Dashboard

Dashboard: Customer Vs Enterprise Sales. It uses the Customer Account Sales Report and Enterprise Account Sales Report as dashboard components.

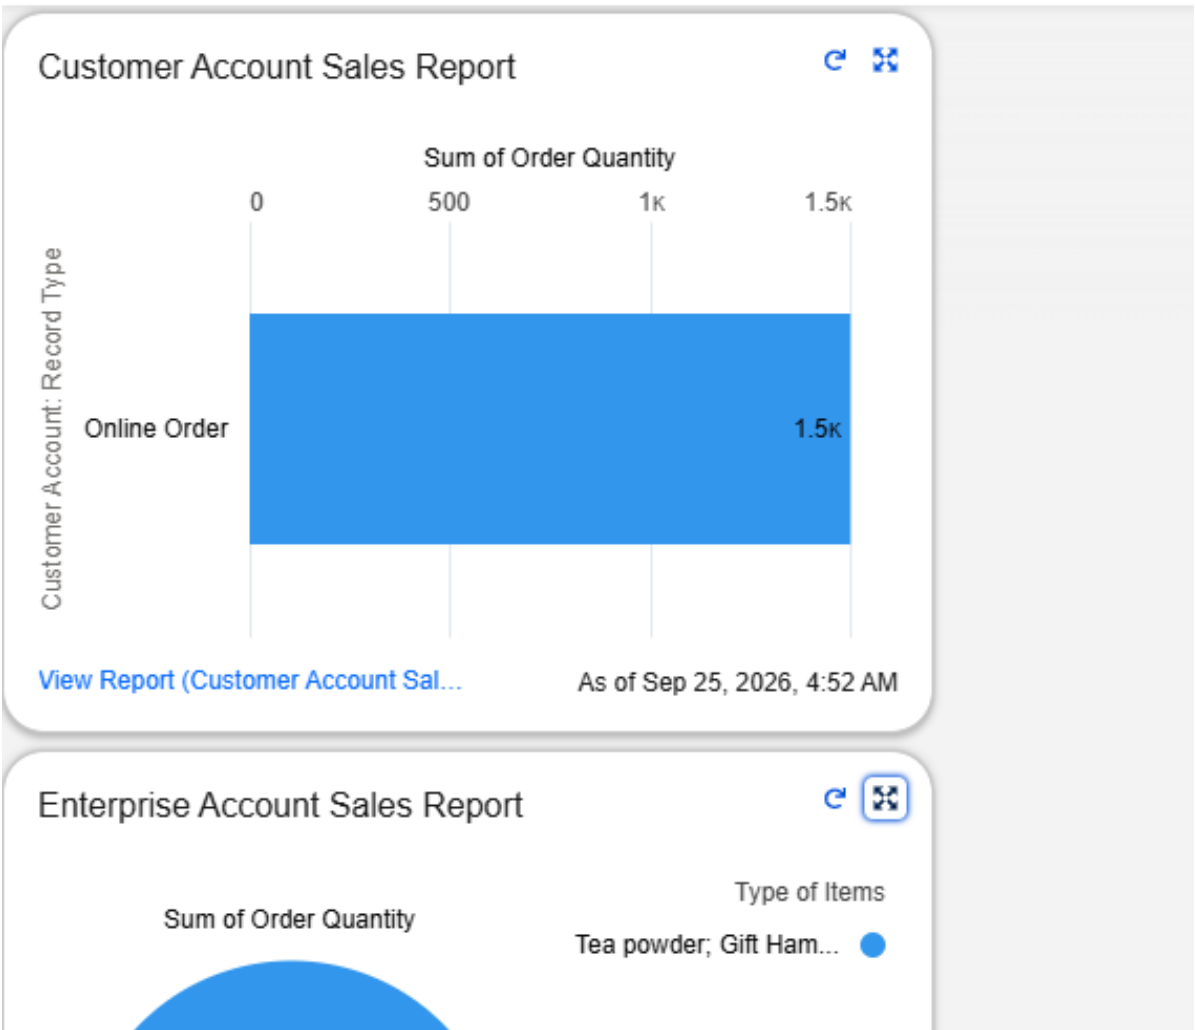

Figure 11. Customer Vs Enterprise Sales Dashboard.

7. Functional & Performance Testing

Test Area	Expected Result	Evidence
Employer / Customer / Enterprise records	Records can be created and displayed with configured fields	Figures 1–4
Record Types	Online Order and Walk-In Order are active	Figure 5
Validation Rules	Invalid input is rejected according to configured rules	Figure 6
Billing formulas	Order Quantity and Total Bill calculate from selected items	Figure 4 + reports
Birthday automation	Daily flow selects birthday	Figures 7–8

	customers and sends email alert	
Reports	Customer and Enterprise reports generate grouped data	Figures 9–10
Dashboard	Customer vs Enterprise sales are visualized	Figure 11

The reference documentation states a performance target of approximately 2–3 seconds for a monthly sales report involving hundreds of customers.

8. Advantages & Disadvantages

Advantages	Disadvantages
Centralized data management	Requires Salesforce license
Reduced manual work	Internet dependency
Automated calculations	Limited offline access
Improved customer engagement	
Real-time analytics	

9. Conclusion

The CRM Application for TheChaiShop&Co integrates customer data, employer information and enterprise records in a Salesforce environment. Automated billing calculations, validation rules, birthday communication, reports and dashboards reduce manual effort and support structured business operations.

10. Future Scope

- Mobile CRM integration
- AI-based sales prediction
- WhatsApp/SMS alerts
- Inventory management
- Multi-branch support
- Advanced customer profiling

11. Appendix

Item	Details
